# Lab Cycle 1

1a. Create a web page having the background in green and title "My First Page".

```
<html>
<head>
<title>My First Page</title>
</head>

<body bgcolor="lightgreen">
<center>
<font face="Verdana" size="5">
<h1>My First Page</h1>
</font>
</center>
</body>
</html>
```

# 1b. Create a web page of pink colour and display moving message in red colour.

```
<html>
 <head>
    <title>Moving Message</title>
    <style>
      marquee{
        background: palevioletred;
        border: black 3px solid;
        padding: 10px;}
   </style>
 </head>
 <body bgcolor="pink">
    <center>
      <font face="Algerian" size="5px">
        <h3>Hello..</h3>
      </font><br>
      <marquee direction="right" behavior="alternate">
        <font face="Verdana" size="4px" color="red">
          This is a Moving Message
        </font>
     </marquee></center></body></html>
```

1c. Design a web page containing text, in form of paragraphs giving suitable heading style.

#### **Program:**

```
<html>
<head>
<title>A Web Of Words</title>
</head>

<body bgcolor="lightgreen">
<!-- Font tag to display text -->
<font size="4" face="Verdana" color="black">
<!-- Displaying the heading -->
<h1><u>A Web Of Words</u></h1>
<!-- Displaying the text -->
```

In 1992, Tim Berners-Lee circulated a document titled "HTML Tags", which outlined just 20 tags, many of which are now obsolete or have taken other forms. The first surviving tag to be defined in the document, after the crucial anchor tag, is the paragraph tag. It wasn't until 1993 that a discussion emerged on the proposed image tag.

```
</font>
</body>
</html>
```

2a. Create a web page which displays WELCOME text using heading tags(h1 to h6).

```
<html>
 <head>
   <title>Welcome Headings</title>
 </head>
 <body bgcolor="burlywood">
          <br><br><
          <!-- Heading tags from h1 to h6 -->
          <center>
                <h1>WELCOME</h1>
                <h2>WELCOME</h2>
                <h3>WELCOME</h3>
                <h4>WELCOME</h4>
                <h5>WELCOME</h5>
                <h6>WELCOME</h6>
          </center>
 </body>
</html>
```

# 2b. Create a web page which displays WELCOME text using tag.

```
<html>
  <head>
    <title>Welcome in Bold</title>
  </head>
  <body>bgcolor="burlywood">
    <center>
           <br><br><
           <font face="Verdana" size="5px">
                 <!-- Normal Welcome text -->
                 WELCOME
                 <br><br><
                 <!-- Welcome text using bold tag -->
                 <b>WELCOME</b>
           </font>
   </center>
  </body>
</html>
```

2c. Create a web page which displays h2o and x2+y2 using <sup> tag and <sub> tag.

```
<html>
  <head>
    <title>Sup Sub Tags</title>
  </head>
  <body bgcolor="burlywood">
    <!-- Center tag to align the text at center -->
    <center>
           <br><br><
           <font face="Verdana">
                  <!-- H2O using sub tag -->
                 <b>Molecular Formula of Water: H<sub>2</sub>0
                  <br>
                  <!-- X2 + Y2 using sup tag -->
                  Equation: X<sup>2</sup> + Y<sup>2</sup> = 69</b>
           </font>
    </center>
  </body>
</html>
```

## 3a. Create a web page to show different attributes of Font tag.

```
<html>
 <head>
   <title>Font tag Attributes</title>
 </head>
 <body bgcolor="beige">
   <font size = "1">Font size = "1"</font><br>
   <font size = "2">Font size = "2"</font><br>
   <font size = "3">Font size = "3"</font><br>
   <font size = "4">Font size = "4"</font><br>
   <font size = "5">Font size = "5"</font><br>
   <font size = "6">Font size = "6"</font><br><br>
   <font face = "Times New Roman" size = "5">Times New Roman</font><br>
   <font face = "Verdana" size = "5">Verdana</font><br>
   <font face = "Comic sans MS" size =" 5">Comic Sans MS</font><br/>br>
   <font face = "WildWest" size = "5">WildWest</font><br>
   <font size ='5' color = "#0000FF">This text is in BLUE</font><br>
   <font size ='5' color = "red">This text is RED</font><br>
 </body>
</html>
```

# 3b. Create a web page to show different attributes: italics, bold, underline.

```
<html>
  <head>
    <title>i b u tags</title>
  </head>
  <body bgcolor="beige">
    <center>
      <font size="5" face="Verdana">
        <!-- i tag for italic text -->
        <em>This text is in Italics
        <br>
        <!-- b tag for bold text -->
        <strong>This text is in Bold</strong>
        <br>
        <!-- u tag for underlined text -->
        <u>This text is underlined</u>
        <br>
      </font>
    </center>
  </body>
</html>
```

3c. Design a web page having background colour yellow and giving text colour red.

```
<html>
 <head>
   <title>Paragraph Tag</title>
 </head>
 <body bgcolor="yellow">
   <font size="4" face="Verdana" color="red">
     <h3><u>HTML Paragraphs</u></h3>
     The HTML < p &gt; element defines a paragraph.
     <br>
     A paragraph always starts on a new line, and browsers automatically add
     some white space (a margin) before and after a paragraph.
   </font>
 </body>
</html>
```

4a. Create a web page using href attribute of anchor tag & the attribute: alink, vlink etc.

```
<html>
  <head>
    <title>Anchor Tag</title>
  </head>
  <body bgcolor="azure" link="blue" alink="yellow" vlink="red">
    <font size="4" face="Verdana">
      Click the below links to go to your desired website:
      <br><br><
      <a href="https://www.youtube.com">YouTube</a><br>
      <a href="https://www.amazon.com">Amazon</a><br>
      <a href="https://www.linkedin.com">Linkedin</a>
    </font>
  </body>
</html>
```

4b. Create links on the words Wi-Fi and LAN to link them to Wikipedia pages.

```
<html>
  <head>
    <title>Anchor Tag</title>
  </head>
  <body bgcolor="azure" link="blue" alink="yellow" vlink="red">
    <font size="4" face="Verdana">
      Click the below links to go to Wikipedia pages:
      <br><br><
      <a href="https://en.wikipedia.org/wiki/Wi-Fi">WiFi</a>
      <br>
      <a href="https://en.wikipedia.org/wiki/Local_area_network">LAN</a>
      <br>
    </font>
  </body>
</html>
```

4c. Create a web page with appropriate content and insert an image towards the left hand side of the page. When user clicks on the image, it should open another Web page.

#### **Program:**

```
<html>
<head>
<title>Blue Whale</title>
</head>
<head>
<body bgcolor="azure" link="black" alink="yellow" vlink="blue">
<font face="verdana" size="4">
<h2><u>BLUE WHALE</u></h2>
```

The blue whale is a marine mammal and a baleen whale. Reaching a maximum confirmed length of 29.9 meters and weighing up to 199 tonnes, it is the largest animal known ever to have existed. The blue whale's long and slender body can be of various shades of greyish-blue dorsally and somewhat lighter underneath.

```
<u>Click to view the full size image:</u><br>
```

```
<a href="https://a-z-animals.com/media/2021/10/What-do-blue-whales-eat-header-e1658345934537.jpg">
```

```
<img src="https://a-z-animals.com/media/2021/10/What-do-blue-whales-eat-header-e1658345934537.jpg" alt="Blue Whale" width="30%" height="30%" align="left" border="3px"></a>
```

</body>

</font><br>

</html>

# 5a. Create a web page, showing an ordered list of the names of five of your friends.

```
<html>
 <head>
   <title>My Friends</title>
 </head>
 <body bgcolor="coral">
   <font size="5" face="Verdana">
    <u>Names of my friends:</u>
     <br>

    type="1">

      Neeraj
      Sathish
      Roshan
      Karthik
      Shreyas
      Sufiyan
     </font>
 </body>
</html>
```

# 5b. Create a web page containing a nested list showing the content page of any book.

```
<html lang="en">
 <head>
   <title>Unix Chapter 1</title>
 </head>
 <body bgcolor="coral">
   <font size="5" face="Verdana">
     <h3><u>Unix for Programmers and Users:</u> </h3>
     <br>
    <b>Chapter 1 What is Unix?</b>
     <br>

    type="1">

      Prerequisites
      Objectives
      Computer Systems
      The Hardware
      CPU
```

```
RAM
    ROM
    CD-ROM
   Chapter Review
   Quiz
    Exercise
   </font>
</body>
</html>
```

5c. Create a web page, showing an unordered list of names of five of your friends.

```
<html lang="en">
 <head>
   <title>My Friends</title>
 </head>
 <body bgcolor="coral">
   <font size="5" face="Verdana">
    <u>Names of my friends:</u>
    <br>
    Neeraj
      Sathish
      Roshan
      Karthik
      Shreyas
      Sufiyan
    </font>
 </body>
</html>
```

6a. Create a table to show your class timetable using rowspan and colspan attributes.

```
<html>
  <head>
    <title>C Section Time Table</title>
    <style>
            body
            {
                  background-color: azure;
                  font-family: Calibri;
                  font-size: 20px;
                  font-weight: bold;
            table,th,td
            {
                  border: 3px solid black;
                  border-collapse: collapse;
                  margin-top: 50px;
                  width: 1000px;
            }
```

```
th,td
      {
         text-align: center;
         height: 40px;
      th:hover, td:hover
      {
         background-color: black;
         color: white;
      }
 </style>
</head>
<body>

6b. Use tables to provide layout to your HTML page describing your college infrastructure.

```
<html>
  <head>
    <title>RVR & JC Infrastructure</title>
    <style>
      table,td
        font-family: Verdana;
        border: 3px solid black;
        border-collapse: collapse;
        margin-top: 3%;
        text-align: center;
      }
      .heading
      { background-color: rgb(247, 158, 86);
        text-align: center;
        border: solid;
        align-self: center;
        padding: 3px;
      }
```

```
</style>
</head>

                 </label><br><br>
           </form>
      </body>
</html>
```

# 7c. Embed Audio and Video into your web page.

```
Program:
```

```
<html>
     <head>
           <title>Audio and Video</title>
     </head>
     <body bgcolor="coral">
           <center>
                 <h1><u>Audio</u></h1>
                 <audio controls>
                       <source src="Stay.mp3" type="audio/mpeg">
                       Your browser does not support the audio tag.
                 </audio>
                 <h1><u>Video</u></h1>
                 <video width="640" height="360" controls>
                       <source src="Marvel Seven Nation Army.mp4"</pre>
                       type="video/mp4">
                       Your browser does not support the video tag.
                 </video>
           </center>
     </body>
</html>
```

8a. Create a webpage which displays the class time table and apply the following effects on the table:

For the table header apply blue as the background colour and white for the colour of the text in the table header.

```
<html>
  <head>
    <title>C Section Time Table</title>
    <style>
      body
      {
        background-color: blue;
        font-family: Calibri;
        font-size: 20px;
        font-weight: bold;
      }
      table,th,td
      {
        border: 3px solid white;
        border-collapse: collapse;
        color: white;
        margin-top: 50px;
```

```
width: 1000px;
  }
  th,td
  {
    text-align: center;
    height: 40px;
  }
  th:hover,td:hover
  {
      background-color: white;
      color: black;
  }
 </style>
</head>
<body>

9a. Create a webpage which displays "Hello World" with font size 20 pixels, bold format, in "Times New Roman" font and green in colour using inline CSS, embedded CSS and external CSS.

#### **Program:**

#### **Inline CSS**

```
<html>
  <head>
    <title>Inline CSS</title>
  </head>
  <body bgcolor="coral">
    <font size="20px" face="Times New Roman" color="green">
      <strong>Hello World</strong>
    </font>
  </body>
</html>
                                 Internal CSS
<html>
  <head>
    <title>Internal CSS</title>
    <style>
      body
     { background-color: coral; }
```

```
font
      {
        font-size: 50px;
        font-family: 'Times New Roman';
        font-weight: bold;
        color: green;
      }
    </style>
 </head>
 <body>
    <font>
      Hello World
    </font>
 </body>
</html>
                                External CSS
Style:
body
{
      background-color: coral;
}
```

```
font
{
  font-size: 50px;
  font-family: 'Times New Roman';
  font-weight: bold;
  color: green;
}
<html>
  <head>
    <title>External CSS</title>
    <link rel="stylesheet" type="text/css" href="Lab 10 Style.css">
  </head>
  <body>
    <font>
      Hello World
    </font>
  </body>
</html>
```

9b. Create a web page containing two images, where one image overlaps another image by using the z-index CSS property.

```
<html>
      <head>
            <title>Image Overlap Using Z-Index</title>
            <style>
                  body
                  {
                        background-color: lightgreen;
                        font-family: Verdana;
                  }
                  .container
                  {
                        position: relative;
                  }
                  img
                  {
                        width: 40%;
                        position: absolute;
                  }
                  .imgone
```

```
z-index: 1;
                  margin-top: 5%;
            }
            .imgtwo
            {
                  z-index: 2;
                  margin-top: 15%;
                  margin-left: 30%;
            .imgthree
            {
                  z-index: 3;
                  margin-top: 5%;
                  margin-left: 60%;
            }
      </style>
</head>
<body>
      <div class="container">
            <img class="imgone" src="Jellyfish.jpg" alt="Image 1">
```

Name: T.Tayyab
Regd. no: Y21CS172

<img class="imgtwo" src="Penguins.jpg" alt="Image 2">

<img class="imgthree" src="Desert.jpg" alt="Image 3">

</div>
</body>
</html>

10a. Create a div element with a width and height of 500px. Create a diagonal linear gradient using the colors of the rainbow—Red, Orange, Yellow, Green, Blue, Indigo, Violet. (Linear Gradient)

```
<html>
      <head>
            <title>Linear Gradient</title>
            <style>
                  .gradient
                  {
                        width: 100%;
                        height: 610px;
                        background: linear-gradient(to top right, red, orange,
                        yellow, green, blue, indigo, violet);
                  }
            </style>
      </head>
      <body>
            <div class="gradient">
            </div>
      </body>
</html>
```

10b. Create a div element with a width and height of 500px. Create a radial gradient with three colors. Start the gradient in the bottom-left corner with the colors changing as they move along the gradient line to the right. (Radial Gradient)

```
<html>
      <head>
            <title>Radial Gradient</title>
            <style>
                  .gradient
                  {
                        width: 100%px;
                         height: 640px;
                         background: radial-gradient(circle at bottom left, red,
                         orange, yellow, green, blue, indigo, violet);
            </style>
      </head>
      <body>
            <div class="gradient">
            </div>
      </body>
</html>
```

# 10c. Create an infinite animation of an element moving in a square pattern. (Animation)

```
Program:
```

```
<html>
      <head>
            <title>Square Animation</title>
            <style>
                  body
                  {background-color: rgb(92, 235, 92);}
                  .square
                  {
